
Byung-Hee Kang

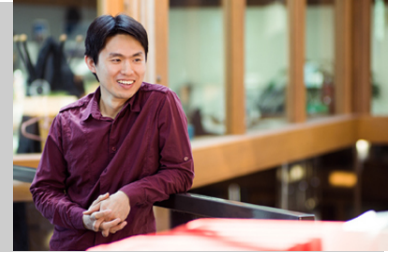

B.Env.D., M.Arch., LEED® AP BD+C | Intern Architect

Education

Master of Architecture, University of Manitoba, 2008
Bachelor of Environmental Design, University of Manitoba, 2006

Affiliations

LEED® Accreditation, Canada Green Building Council

ROLE IN PROJECT

Byung-Hee provides project design and LEED® accreditation support.

BIO

Byung-Hee has studied and worked in south Korea, Australia and Canada and brings his multi-cultural viewpoints to ACI. Byung is involved in various aspects of the design process, requiring careful decision-making with a firm understanding of an architectural role to our environment. His experience ranges from renovating commercial buildings to University campus master planning.

As a LEED® AP, Byung-Hee is fully involved in space planning, coordinating with consultants and documenting LEED®, to make sure that ACI achieves its environmental goals on every project.

Excelsior Hotel Renovation
Khartoum, Sudan

Master plan of Yonsei University new campus
Incheon, South Korea

Seoul City Hall plan
Seoul, South Korea

"Are you an architect or a sculptor or a painter?"

"This question was asked of me during my thesis presentation. I then understood that the profession is very versatile. As Intern Architect I not only support the lead architect but also take responsibility for resolving technical challenges in complex architectural designs.

Since joining ACI my role in bringing fresh academic thinking to expand ACI's understanding of basic human needs has been clear.

As a LEED Accredited Professional, I value the opportunity to bring sustainability to our projects. This is my commitment to our environment."

- Byung-Hee
