

Mumtaz Anwar

B.Arch. | Intern Architect

Education

CACB, 2002

Bachelor of Architecture, Khulna University, Bangladesh, 1997

ROLE IN PROJECT

Mumtaz provides project design support.

BIO

Mumtaz began her career in Bangladesh where she worked as an architect for over 7 years on a variety of institutional and commercial projects.

Since joining ACI Mumtaz has had the opportunity to hone her design skills while continuing to develop in the areas of working drawings and contract documentation. Mumtaz works on both large and small scale architectural projects as well as multiple tenant improvement projects, including renovations done for the Misericordia Community Hospital.

Mumtaz is largely responsible for architectural design and developing cohesive and comprehensive working drawing sets for any project she is assigned. Mumtaz brings a unique talent set to ACI and is an integral part of the team.

Centre (ABSLETC), Design Build
Fort MacLeod, AB

ADDITIONAL PROJECTS

Copper Horne Chateau
Radium Hot Springs, BC

"My interest in Architecture developed from a very young age and has since become a passion. Design is one thing that always keeps me motivated, engaged and creative. Being from a third-world country, architecture has always been a natural impulse, a calling for me to improve reality, to create a better world, a better tomorrow for the broken world. As creation is a powerful skill, I believe that by expressing unique ideas in a positive way a parallel can be achieved between our imagination and the real world in which we live.

My career at ACI has been the new beginning of a personal journey that has broadened my horizons and allowed me to explore new approaches to creative work and enlightened me to the endless possibilities that exist." - Mumtaz
