# Tracy Froland

Dip. Arch., IDT | Design Technologist

## Education

Interior Design Technology Diploma, Northern Alberta Institute of Technology (NAIT), 2010  
Architectural Technology Diploma, Northern Alberta Institute of Technology (NAIT), 2004

## ROLE IN PROJECT

Tracy provides Interior Design and contract documentation support.

## BIO

With training in both Architectural and Interior Design Technologies, Tracy is well versed in numerous aspects of the construction process, including contract documentation and interior design. Training in three-dimensional imaging, graphic design and architectural drafting makes Tracy an asset to the ACI team. Tracy works on large and small-scale tenant improvement projects, as well as large scale architectural projects. Consequently, Tracy possesses an ever-widening base of knowledge, making her an integral part of the design and contract document team. With over nine years of experience in the profession, and a keen interest in both the architectural and interior design aspects of any project, Tracy provides constant dedication and enthusiasm to her work.

## EXTRAS

Tracy volunteers her time to assist the Leduc Communities in Bloom committee design and develop the 'Judges book' for award entry.

The Town of Chestermere  
Chestermere, AB

### Additional Projects

Prolux Lighting Tenant Improvement  
Edmonton, AB

Operating Engineers Offices  
International Union of Operating Engineers  
Fort McMurray, AB

---

*"Like the ever-changing world of Architecture and Design, my career has taken on a life of its own, constantly reshaping and adapting to the many influences around me. A great love and appreciation for art and architecture started me on what I consider now to be one of the greatest adventures in my life: a career in the design industry. My love for this profession took me from architecture into design and coupled with advancements in technology finally gave me the ability to create vision through graphic design. To bring a design to life before it is built, to interact with clients on this level, and to see their vision become a reality are why I remain faithful to design and to what it can offer. Human beings are inspired and ambitious: we can dream, design and build wonderful works of art and architecture. Technology helps me express and share these visions with the world." - Tracy*
