

## APPI'S NEW TRAINING KIT

is designed to help rendering employees become **FSMA** compliant and more knowledgeable about **Salmonella** and its risk. It can be used with specific plant training to help convey the important message to workers about the critical need for *Salmonella* reduction. An important goal is to promote employee commitment to **biosecurity, food safety and hygiene**.

Each "**Salmonella Reduction and Feed Safety: You are the First Line of Defense**" training kit includes:

- A 15 minute video on animal food safety and specific ways to contain, eliminate and prevent *Salmonella* in English (Spanish version also available)
- 10 bilingual posters in ready-to-print pdf format to reinforce the video's major points to workers about *Salmonella* containment, elimination, and prevention. These can be printed on posters or signs.
- A brief manual on animal food and Salmonella safety in English (Spanish version also available)
