

Congratulations on completing the 2nd grade! Let's keep the momentum going so that you are ready for all the fun learning that happens in third grade! This summer take time to read, practice those addition and subtraction facts, and have some FUN.

READING: Set aside 15 minutes each day for reading. Use the summer reading list found online at www.stmschool.net to help select appropriate books for his or her reading level. This year we will use an activity menu instead of a book log. The instructions are on the page. Have fun!!

MATH: Addition and subtraction facts 1-20 are important in helping with problem solving and higher level thinking skills. In order to help keep these skills fresh and ready for third grade please use the IXL program online. You will find the directions for logging in and setting up your profile at www.stmschool.net

Remember math games are also a way to get creative! Grabbing some dice or playing cards provide a wonderful way to develop math skills.

These assignments will help make the transition into third grade easier. See you all in August! Have a fun summer learning, exploring, and relaxing.

Ms. Eaton and Mrs. Hettrick
