

# Find your place in your healthcare system

Healthcare 101:  
Designed with Albertans, for Albertans

Our healthcare system in Alberta is made up of many different partners, services, and resources. They all work together to provide healthcare to Albertans.

It's important for all of us to understand the healthcare system and take an active role in our health.

Healthcare 101 has been designed with patients, families, citizens and healthcare providers in order to help Albertans have to better understand the healthcare landscape.

## Topic 1: Healthcare Basics for Albertans

Healthcare Basics puts Alberta's healthcare system into perspective.

The first topic outlines the foundation and partners of our healthcare system.

These partners include the government and non-government organizations, services and resources that provide healthcare.
